Hello Raja, I will see if my video editor friend can do anything with it here.

All best, LC

Hello Louise,

All ok here. I'm still working with the files. The problem is that the last video you sent me is very large and I'm trying to see if I can compress it to fit within the budget.

I'm available Wednesday at 11.30AM, Thursday at 10AM or 12PM, and Friday at 11AM (all CET) this week. I'm also available at 1PM CET every day. But I guess that'd be an odd time for you?

Regards,

Raja

Hello Raja

Hoping all is ok with you and I've not left you with difficulties with the files!

Lucas can't meet tomorrow. What day is good for you? All best lc

Hello Raja

Just want to make sure you got that file okay.

I am in the process of compressing the loops right now and then, everything is finally ready! So sorry to make this delay but it is worth it because we have a coherent bundle:

- the PDF
- the intro of the explainer
- the intergenerational transmission video with the documentation of performances
- the video transfer of the film loops, crucial for re-staging HF1.

Is there a need to have anything like a short document from you and me explaining what we're doing?

All best, LC

Hi Raja

Here's the link for the 'intergenerational transmission' video - this is the documentation of the whole piece I want to include if we possibly can. What's significant about this is that it demonstrates the work can be performed successfully by people other than Malcolm but it also includes Malcolm.

The source footage for this is all different formats so the quality is a bit patchy but good enough I think esp. once you compress it to make it viable for our project.

https://www.icloud.com/iclouddrive/04doUhjrhB58PX3uSrJDOIQCQ#Horror_Film_1_Intergenerational_Transmission

The footage of the loops is still to come, right now I have it off DPX files and on Pro Res, I will get that down to something compressed with H264 that you should be able to work with. That duration is very short so the final file size should be very small (duration c. 60 seconds).

All best, LC

Dear Louise,

Just wanted to check with you and see if you have any updates regarding the video.

Regards,

Raja

Hello Louise,

No problem regarding the budget – we'll do what we can in that case.

Let me know when you have the video ready. We'll looking into transcoding it to shrink it and then reshare it back with you for a final confirmation.

Regards,

Raja

Hi Raja

Getting extra \$ is not going to be possible in the time available unfortunately.

Please find attached the re-sized PDF in a layout that is what we would like to send 'into the future' stored on DNA ...

I am going to re-send you the video file of the performance but it will be Tuesday evening my time I do that.

Please use this email for this week, I am between unis, starting at my new uni on 20 Feb where I will be l.curham@curtin.edu.au. But for this week, this yahoo is the place for us to connect.

All best, Louise

Hi Louise,

No problems! Here's the quick version, it's just a resized version of the PDF you emailed. The file comes in at 5.2mb, however I Can increase the quality of this if need be (I think it could be done at around the 10-12mb mark). I'll get started on a one page sample of the rebuilt version.

John.
